

HyperDrive® EnCryptPLUS FIPS 197 Edition

AES 256-Bit Hardware Encrypted USB

Data. Protected.

The HyperDrive® EnCryptPLUS FIPS 197 Encrypted USB 3.0 Drive combines high level security with easy-to-use functionality to protect data in the workplace and on the move. Mandatory Encryption and Password protection guarantees 100% privacy of all data stored on the drive with minimal fuss.

Simple, Ultra-Secure Storage

The EnCryptPLUS FIPS 197 Edition features Military level 256-Bit AES Hardware Encryption as well as a range of additional security features, all of which operate from within the device.

The Super Speed USB 3.0 specification allows for fast file transfer and is compatible with Windows XP, Vista, 7, 8, 10 and Mac OS X with no software or driver installation required.

Security Features:

- ✓ FIPS 197 Approved No. 4477
- ✓ 256-Bit AES Hardware Encryption
- ✓ Brute-Force Attack protection
- ✓ High Strength Password Required
- ✓ Mandatory Encryption of all files
- ✓ Failed Password Entry Count
- ✓ Auto-Lock functionality
- ✓ Endpoint Software Compatible
- ✓ USB 3.0 Super Speed Connection
- ✓ No Software or Drivers Required
- ✓ Windows & Mac OS Compatible

Configure Your Device for added Security with Bespoke Configuration Services from Hypertec:

Endpoint Security- Bespoke Vendor & ID Strings can be added to protect against unauthorised access on other PCs. This provides a convenient way to identify the device as an official company drive and removes the risk of transferring data to unauthorised machines.

Repatriation Service - We can supply drives with a FREEPOST address and identifier. If a lost drive is found and posted we can return it to you with your confidentiality intact.

Order Now using our Easy Online Config Form:

Other Bespoke Configuration Services available from Hypertec:

Custom Branding - We have custom branding options available and can print your Company logo directly onto the drive. Customers that choose this option can also choose a casing colour for the best printing result (Black/Silver)

We also offer laser etching for Serial Numbers if required for auditing.

Custom Lock/Boot Menu - One of our most popular services is to pre-configure drives to include a custom branded interface. These menus can appear on startup and be configured to display specific instructions or options.

Data Preload - We can deliver your drives ready populated with pre-existing files of your choice such as Company PDFs, Documents or Images.

All bespoke services are available at an additional cost. Please contact your Hypertec Account Manager or fill in our [Easy Online Config Form](#) for a quote on the services you require.
