

## Anti-Glare Filter for iPhone X, self-adhesive

The filters reduce reflections caused by sunlight and protect the screen from scratches. The film adheres directly to the screen thanks to the use of a silicon layer.

The DICOTA screen protector takes care of various tasks: it protects the screen against scratches, reduces annoying fingerprint marks and is easy to attach. In addition, the high-resolution screen becomes anti-reflective, ensuring clear visibility. The screen protector is your first choice.
