

QUICK START GUIDE

DataLocker Sentry ONE - Encrypted Flash Drive

1. Plug the secure USB drive in:

- Wait for up to 30 seconds
- No need to restart your computer
- Drive letters vary with computer

 (D:) Unlocker

2. Double-click & Run the **Unlocker** application.

- Windows: Start > This PC > Unlocker > Unlocker
- Mac: Finder > Unlocker > Unlocker

3. Follow the steps in the Unlocker software when prompted.

- **If the device is to be managed by [SafeConsole](#)** you will need to follow the steps provided by your administrator or organization to complete the setup. DataLocker cannot provide your organization specific details.
- Sentry ONE devices engraved with MANAGED on the front (and with M at the end of the article/SKU, marked on the back) always require a SafeConsole device control license (which is sold separately).

4. After you have unlocked the device your secure storage will mount/connect and become accessible.

 (D:) Unlocker

 (E:) PRIVATE USB

- You can move your important files to the PRIVATE_USB drive and they will be automatically encrypted.

5. Sentry ONE locks when it is unplugged, powered down, timed out, locked from the menu or when you log out.
