

Cable USB 2.0-A male > USB mini-B 5pin male angled 5m

Description

This USB 2.0 cable by Delock stands out due to its angled USB mini-B connector and is suitable for different devices with mini USB interface, especially for cameras. Photographers use this angled cable solution, e.g. in a photo studio to link their camera to a PC or notebook. The angled connector provides a stable hold inside the mini USB female port and a more comfortable working. The higher cable gauge for power line and the twisted data lines ensures a safe connection between your devices and computer.
