

Veeam Offerings QuickSpecs

Together, HPE and Veeam help you safeguard your data to ensure it's always on, always protected, and that your enterprise is always able to rapidly and easily recover should a situation arise – from human error to a malicious attack.

For over 10 years, HPE and Veeam have been trusted to help you protect your data everywhere and rapidly recover your data in minutes, to ensure business resilience, reduce risk, and reduced resource constraints to achieve 317% 3 year ROI.*

Our proven solutions maximize data and application availability from on-premises to cloud—and raise the bar on mission-critical availability. HPE gives you the choice and flexibility to place your data where it makes most sense, delivering our solutions as-a-service on and off-premises, and you pay only for what you need.

Overview

Notes:

- ***please note:** Veeam has rebranded several of its mainstream offerings.
 - Veeam Backup and Replication is now Veeam Data Platform Foundation
 - Veeam Availability Suite is now Veeam Data Platform Advanced
 - Veeam Disaster Recovery Orchestrator is now Veeam Recovery Orchestrator
 - Veeam NAS Capacity is now Veeam Capacity Pack (CPT)

Rapidly recover your data

Ensure your data is always on with our mission-critical availability and data protection solutions. And rapidly recover your data at its most granular level, especially in virtualized environments, with HPE Alletra Storage MP and Veeam Data Platform – and reduce RPO and RTO.

Strong immutability for ransomware protection

As customers are finding ways to optimize IT investment, they are utilizing a mix of hardware solutions, and virtual and physical infrastructure, on-premises and in the cloud. Achieve simple, integrated point-and-click data management that extends to the cloud with HPE SimpliVity, HPE Alletra dHCI, and Veeam Data Platform.

Simplify data protection

As customers are finding ways to optimize IT investment, they are utilizing a mix of HW solutions, virtual and physical infrastructure on-premises and in the cloud. Achieve simple, integrated point-and-click data management that extends to the cloud with HPE SimpliVity, HPE Alletra 6000 dHCI, HPE Nimble dHCI and Veeam.

Get data protection as-a-service

Have the choice and flexibility to protect your data—on-premises to cloud. Enjoy pay-per-use models with HPE GreenLake – so you can scale resources up and down as needed.

HPE Complete – Developing, Optimizing and Validating HPE industry leading products with Industry leading ISV Solutions

HPE Complete enables the purchase of best in class third party branded products with the added reliability of Hewlett Packard Enterprise's interop assurance for a complete validated solution, all via one HPE purchase order.

Benefits

- Offering customer solutions requiring both HPE and third-party products via one HPE purchase order.
- Find tailored HPE product configurations that have been validated for use with industry leading software solutions. Most solutions come with custom HPE/Partner configuration and integration guides and tools.
- These solutions utilize both third-party and HPE expertise for installation, support, and warranty. Third-party providers and HPE cover their respective parts of the solutions. However, HPE Complete engineering will step in to facilitate third-party issue resolution when required to assist in overall customer satisfaction.
- Risk, complexity and cost are minimized when deploying multi-vendor products and technologies into customer ecosystems.

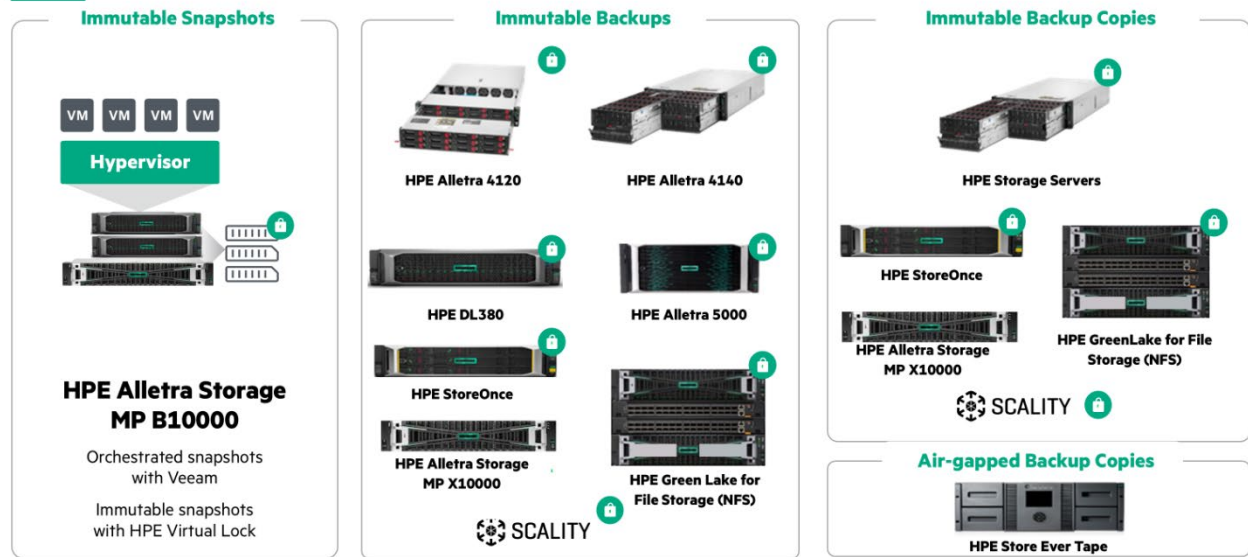

Veeam is made available by the HPE Complete Program. For more information please refer to HPE Complete on HPE.com

Overview

HPE and Veeam – Always on. Always Protected. Solution details

Our integrated solutions (shown in figure 1) are fast, simple, automated – and simplify your operations with infrastructure that practically manages itself.

End-to-end immutability with HPE Solutions with Veeam

HPE GreenLake data protection as a service

Standard Features

HPE Storage Snapshot Integration with Veeam

For fast daily restores and the least data loss use HPE Alletra, HPE Primera and HPE Nimble Storage with Veeam Data Platform Foundation to orchestrate snapshot execution for improved efficiency, compared to hypervisor snapshots. This integration allows the simple creation of image-based backups and replicas to help meet strict RPO requirements with little impact on production. Storage snapshots, created by or created independently from Veeam Data Platform Foundation, can be viewed and individual files or entire VMs are quickly and directly recovered by Veeam Explorer at no extra charge. Recent advances include further native integration of Veeam Offerings with HPE Immutability (Virtual Lock) for Storage Snapshot.

For more information on our HPE Primary Storage offerings with Veeam, see [HPE Storage Server 4000 family](#)

HPE Data Protection Solutions with Veeam

For significantly improved space saving compared to using regular disk and Veeam deduplication, backup repositories can be built on HPE StoreOnce systems. HPE StoreOnce Systems offer physical capacities from 56 TB to 1.2 PB. This is equivalent to 18PB, considering typical StoreOnce deduplication rates. HPE StoreOnce Systems can be deployed as physical or virtual appliances. For efficiency and performance, Veeam connectivity to StoreOnce can use the data protection optimized StoreOnce Catalyst protocols over WAN, LAN and FiberChannel. NAS and virtual tape (VTL) protocols are also available for StoreOnce connectivity. HPE StoreOnce with Veeam delivers higher data availability by efficiently moving backup copies offsite for disaster recovery.

Veeam repositories can be stored on HPE Apollo 4000 Servers, HPE Alletra 5000 and HPE Nimble Adaptive Flash Storage. Using HPE Nimble Adaptive Flash Storage, leverage your secondary storage for DevOps, DevTest and similar workloads to achieve fast granular restore and instant recovery. If you prefer a single infrastructure solution for backup processing and storage, HPE Apollo Servers can meet your needs, with linear scalability achieved by adding new infrastructure units.

HPE StoreEver tape is integrated with Veeam for long-term archival and off-site storage for large data sets.

For more information on any of these Secondary Storage solutions with Veeam, see [HPE StoreOnce, HPE Apollo](#) and [HPE StoreEver web pages](#).

HPE SimpliVity with Veeam

HPE SimpliVity provides customers with an enterprise-grade hyperconverged platform that provides native data protection. By adding Veeam, HPE SimpliVity customers extend intelligent data management from on premises to the cloud, while preserving HPE SimpliVity's unique functionality like near instantaneous backup, restore, and clone, plus guaranteed data efficiency across the HPE SimpliVity federation. Veeam provides comprehensive data availability management for mixed platform environments including HPE SimpliVity, and customers benefit from granular application item restores, application consistent backups, and backup to long-term retention options such as tape and cloud.

Standard Features

HPE Alletra dHCI and HPE Nimble dHCI with Veeam

With Veeam and HPE Alletra dHCI and HPE Nimble dHCI organizations can expand their use of the flexible backup choices available for vSphere environments, leveraging Veeam-native integration with HPE Alletra and HPE Nimble snapshots. This results in a reduced impact of backups to the production environment—with backup from storage snapshots, including storage snapshotting with retention. The advantage of this particular integration is not limited to faster backup processes. It also eliminates the well-known undesirable side effects of backup on production services (such as slow response times or momentary application freezes).

Veeam and HPE Alletra dHCI and HPE Nimble dHCI together provide fast, granular restores from storage snapshots with Veeam Explorer for Storage Snapshots in addition to Veeam-managed primary and secondary snapshot orchestration to provide frequent (sub-day) restore points. Instant VM recovery and DataLabs from storage snapshots that are as fast as production—ideal for supporting developers' pre-production testing with Veeam On-Demand Sandbox for Storage Snapshots

HPE All-in-One Solutions with Veeam

As the amount and types of data continues to grow, there is an immediate and critical need to protect this data reliably. At the same time, the risk of data loss and variety of threats are increasing. In addition to ransomware threats and cyberattacks, network and power outages, component failure, human error, willful malevolence, data corruption, software bugs, site failures, and even natural disasters are just a few sources of application downtime and data loss.

Hewlett Packard Enterprise has tailored a ProLiant Server configuration, the DL380 Gen11, which combined with leading Veeam Backup and Recovery products to create an integrated, all-in-one data protection platform for small and mid-size organizations as well as enterprise ROBO deployments. It offers a fast and cost-effective backup, replication, recovery, instant access and restore, all in a convenient 2U platform.

For larger environments, Reference Architectures (RA) have been defined utilizing the HPE Alletra Storage Server 4000 family. Medium-sized environments can use HPE Alletra Storage Server 4120, and large environments can use the ultra-dense HPE Alletra Storage Server 4140 and then scale-out adding more nodes as building blocks of a larger solution. This process is simple because each unit has a balanced mix of storage, compute, and connectivity.

In summary, the HPE and Veeam all-in-one solutions offer a fast and cost-effective data protection infrastructure for any workload delivering the following benefits:

Fully tested – 3rd generation – 6y of improvements - Zero-risk

- Save your time adopting optimized and tested configurations.
- Reduce risks with predictable high performance.
- Fully compliant with Veeam best practices for all use cases.

Customizable storage capacity

- Select Disk capacity from 2TB to 20TB, or more when available.
 - For easier management, prefer configurations with all disks included. If you need less capacity, use smaller disks.
 - Half disk-populated configurations are possible, but to upgrade it is generally necessary to create a second Volume and File System

Standard Features

Customizable connectivity

- Choose LAN, FC and cables to meet your requirements.
- Prefer high speed connections, rather than bonding ports
- The Veeam hardened-Linux doesn't support Snapshot integration. Do not install HBA, use additional Proxies with FC/iSCSI connectivity.

Easy to Configure

- **Use the following UCIDs as starting points you can tailor to your specific customer needs**
 - 5137645999-01 - VEEAM XL Alletra-4140 92x20TB HBA-2p64FC 2p10BT 2p100GbE 2024-03-14

OS (Veeam and server supported versions)	Windows, Linux	Windows, Linux	Windows, Linux

Standard Features

Veeam Offerings

Veeam® now holds the global #1 position in IDC's Worldwide Semiannual Software Tracker 2024 for Data Replication & Protection*. Veeam provides a single platform for modernizing backup, accelerating hybrid cloud and securing your data. Our solutions are simple to install and run, flexible enough to fit into any environment and always reliable.

Veeam offers a range of software products for data protection, including their market leading Veeam Data Platform Foundation (formerly Backup & Replication) software for virtual environment protection, and additional options for the protection of physical machines, as well as Microsoft 365, and Salesforce data. The core data protection software is complemented with Veeam ONE and Veeam Management Package for System Center management software. For purchasing efficiency bundles are offered:

- Veeam Data Platform Advanced (formerly Availability Suite) bundles Veeam Data Platform Foundation (formerly Backup and & Replication) software with Veeam ONE software.
- Recovery planning is made straightforward and robust with Veeam Recovery Orchestrator (formerly Veeam Disaster Recovery Orchestrator).
- Veeam Data Platform Premium bundles Veeam Data Platform Advanced with Veeam Recovery Orchestrator.

Veeam licenses software in a variety of ways depending on the specific product and/or use case.

- Perpetual licenses are offered, which do not expire, and include one year of either 8x5 or 24x7 support and maintenance. Subscription licenses are also available. These licenses allow use of the product over a defined period of time. Subscription licenses expire at the end of the subscription term and include 24x7 support. One to five-year subscription licenses are available, and customers will purchase the entire subscription up front.
- Veeam offers universal licensing, a portable (perpetual or subscription) license that enables the use of one license across many products and workloads, deployable on premise or in a (multi) cloud environment. The Veeam® Universal License (VUL) is a flexible and portable solution for protecting various workloads on premises and in the cloud. Universal licensing makes protecting and restoring backups to multi-cloud and hybrid environments easier than ever and avoids additional fees that other vendors may charge. Universal licenses are sold in bundles of 10, and can be used to protect any combination of VMs, Servers, Workstations or Cloud VMs. Socket licenses are also available, and are sold by single socket.

Notes: *2024 Results from IDC's Worldwide Semiannual Software Tracker for Data Replication and Protection Software

Standard Features

The Veeam solutions

Address a range of data protection requirements as shown in the graphic below. These solutions are described in the 'Features and Benefits' section detail below. Configuration guidelines and required part numbers are described in the 'Configuration Information' section that follows.

I need to...	Veeam Offerings License Required
Protect my workloads – cloud, virtual, physical and unstructured data	Veeam Data Platform Foundation, Veeam Data Platform Advanced, Veeam Data Platform Premium
Manage my Veeam and IT infrastructure	Veeam Data Platform Advanced, Veeam Data Platform Premium, Veeam One
Automate and improve the efficiency of my Data Recovery planning and execution	Veeam Recovery Orchestrator, Veeam Data Platform Premium
View and restore from HPE Storage snapshots	Veeam Explorer for Storage Snapshots (feature of all Veeam Data Platform products)
Manage my infrastructure from Microsoft System Centre	Veeam Management Pack for Microsoft System Center
Protect my Microsoft 365 data	Veeam Backup for Microsoft 365
Protect my Salesforce data	Veeam Backup for Salesforce
Protect my Kubernetes applications	Veeam Kasten for Kubernetes

Standard Features

Veeam Data Platform Foundation (formerly Backup & Replication)

Veeam Data Platform Foundation (formerly Backup & Replication) is the core Veeam product. Using a single management console, it can protect virtual servers, physical machines and cloud-based workloads. HPE Primera and HPE Nimble Storage integrates to enable backup from storage snapshots for fast backups and low RPOs. Scale-out Backup Repositories can be created on HPE StoreOnce Systems to minimize space consumed by VM replicas and other backup data. Alternatively, HPE Nimble Storage and HPE Apollo Server can be deployed as backup targets. For long term backup data storage Veeam Data Platform Foundation (formerly Backup & Replication) supports HPE StoreEver tape products.

Key features of Veeam Data Platform Foundation (formerly Backup & Replication) are:

- Image-level VM backups: Create application-consistent backups with advanced application-aware processing.
- Backup from Storage Snapshots: Generate ultra-fast backups with low RPOs from storage snapshots from HPE Alletra, HPE Nimble Storage, and HPE Primera.
- Higher data availability with efficient movement of backup copies offsite for disaster recovery
- Support of NAS backup to protect any NAS appliance such as, Qumulo, along with other non HPE NAS platforms on an HPE Apollo 4000 Systems, HPE StoreOnce System or HPE Nimble backup target providing the flexibility of choosing a right balance of price, scalability and performance.
- Unify management of protection of physical and cloud environments
- Scale-out Backup Repository: Create a single virtual pool of backup storage to which backups can be assigned, offering the freedom to easily extend backup storage capacity.
- SureBackup: Automatically test and verify every backup and every VM for recoverability.
- Image-based VM replication with WAN acceleration: Get backups off site up to 50x faster than non-accelerated traffic and save bandwidth for offsite for disaster recovery (DR).
- Direct Storage Access: Perform vSphere backups faster and with reduced impact by backing up via Direct SAN Access and Direct NFS Access.
- Instant VM Recovery: Restore access to a failed VM in less than two minutes while the full restore is executed in parallel.
- Native tape support: Store entire VM backups or individual files on HPE StoreEver with direct restore from tape.
- SureReplica: Automatically test and verify every VM replica for recoverability.

For more details on Veeam Data Platform Foundation (formerly Backup & Replication) see the: [Veeam Backup & Replication](#) web pages.

Veeam ONE

Veeam ONE helps you to realize comprehensive monitoring and analytics for your backup, virtual and physical environments.

Veeam ONE is for backup environment management. It can be used as an extension of Veeam Data Platform Foundation and for VMware, Hyper-V and physical environments provides real-time, unattended 24x7 performance monitoring of, designed to notify you of issues before applications and users are negatively impacted. Veeam ONE Monitoring tool functionality includes:

- Real-time customizable, dashboards with drill-down views and more than 200 pre-set alarms.
- Custom Report Builder that can pull data from any field inside any existing report into one, all-inclusive report.
- Dashboards designed to reduce discovery and troubleshooting times, dashboards for backup infrastructure performance and trends, dashboards for top consumers by any resource, etc.

Standard Features

- Identification of VMs that cannot be protected because of unsupported configurations (e.g., VMs with pRDM or independent disks in VMware Storage), over commitment and more.
- Reports to calculate the cost of compute and storage resources to enable for chargeback and billing.
- Backup infrastructure availability assessment with a dedicated set of assessment reports to ensure the configuration of VMs and physical devices is supported, VMs are processed by backup jobs, backups are running as planned and there is adequate storage space to support the retention policy.
- Capacity planning for VMware, Hyper-V and Backup using analysis of historical data including 'what-if' modelling to eliminate guesswork and Excel-based and manual calculations.
- Automated backup and VMware change tracking to make change auditing and forensic analysis transparent.

For more details on Veeam ONE see the [Veeam ONE](#) web pages.

Standard Features

Veeam Data Platform Advanced (formerly Availability Suite)

Veeam Data Platform Advanced (formerly Availability Suite) bundles Veeam Data Platform Foundation (formerly Backup & Replication) product with Veeam ONE. Purchasing Veeam Data Platform Advanced is lower cost than purchasing Veeam Data Platform Foundation and Veeam ONE individually.

Veeam Data Platform Advanced is also available bundled with Veeam Recovery Orchestrator as **Veeam Data Platform Premium**.

For more details on Veeam Data Platform Premium, see the [Veeam Data Platform Premium](#) web pages.

For more details on Veeam Data Platform Advanced see the [Veeam Availability Suite](#) web pages.

Veeam Explorer for Storage Snapshots

Veeam Explorers are distributed as part of all Veeam Data Platform products and do not have to be licensed or installed separately. The Veeam Explorers extends the functionality of Veeam Data Platform products by allowing you to view and recover application items from the backup or replica files without having to restore the virtual machine entirely. There are Veeam Explorers for

- Microsoft Exchange - Instant visibility and granular recovery of individual Exchange items, including hard-deleted items, detailed export reports for eDiscovery and more.
- Active Directory - Instantly recover individual AD objects and entire containers, easily recover user accounts and passwords, enable restores of Group Policy Objects (GPOs), Active Directory- integrated DNS records and more.
- Microsoft SharePoint - Instant visibility into SharePoint backups; easily find and recover specific SharePoint items as well as individual sites.
- Microsoft SQL Server - Fast transaction and table-level recovery of SQL databases allowing for precise point-in-time restore.
- Oracle - Transaction-level recovery of Oracle databases, including agentless transaction log backups, enabling precise point-in-time restore.
- Microsoft OneDrive for Business - For recovery of all users OneDrive or certain documents and/or folders of the selected OneDrive.
- Veeam Explorer for Storage Snapshots - Restore VMware VM data directly from native HPE Storage snapshots. It automates the process of data recovery for VMs hosted on HPE Storage systems, eliminates intermediate restore and manual operations. As a result, you can restore necessary VM data from storage snapshots in seconds.

For more information see the web page for [Veeam Explorer for Storage Snapshots](#).

For more information see the web pages for [Veeam Storage System Snapshot Integration](#) and [Veeam Application Item Restore from Storage Snapshots](#)

Standard Features

Veeam Recovery Orchestrator (formerly Disaster Recovery Orchestrator)

Veeam® Recovery Orchestrator enables users to reliably ensure the continuity of their IT services at any scale through extensible recovery orchestration from Veeam-powered backups, replicas, CDP replicas and storage snapshots. Eliminate the manual, time-consuming and repeatable processes that hinder necessary DR planning by automatically testing, documenting and executing disaster recovery plans in as little as 1-click from single applications to entire sites.

The key features of Veeam Recovery Orchestrator are:

- Dynamically document, automatically test and reliably execute DR plans for compliance with industry regulations and audits
- Automated tests to prove recoverability and disaster recovery readiness checks with zero impact on production systems
- Real-time reports and dashboards for plan readiness, execution and testing
- IT service continuity and minimize service disruption through automated failover and failback of multi-site disaster recovery plans for planned migrations, disaster avoidance and disaster recovery
- VM, application and service verification – like database, mail and web – during failover with predefined start-up sequences
- Remotely control and integrate into other business continuity tools through an open API

Veeam Recover Orchestrator is also available bundled with Veeam Data Platform Advanced as Veeam Data Platform Premium.

For more details on Veeam Data Platform Premium, see the [Veeam Data Platform Premium](#) web pages.

For more details on Veeam Recovery Orchestrator see the [Veeam Recovery Orchestrator](#) web pages.

Veeam Management Pack for Microsoft System Center

Veeam Management Pack enables Microsoft System Center administrators to monitor their Veeam Data Platform Foundation protected environments, Hyper-V environments, VMware vSphere environments and Windows servers all from the Microsoft System Center management console. Key features are:

- App-to-metal visibility for virtual and physical environments for the “big-picture” of the infrastructure from the System Center Management console.
- Stream Veeam Management Pack alerts and performance data into Microsoft Operations Management Suite for instant business insights into on-premises infrastructures.
- Maintain complete control and visibility for Windows-based (physical) and virtual-based (VMware and Hyper-V) Veeam-powered backup jobs.
- Manage and plan for growth with capacity planning reports.
- Predict resources needed to run your workloads in a hybrid cloud.
- Get detailed snapshot and checkpoint tracking and reporting.
- Find problems fast and shorten the time between problem discovery and recovery.
- Increase data-center efficiency using analysis reports to right size your VMs, find idle VMs and reclaim critical resources.
- Track all your VMware vSphere environments — even if they are deployed on Amazon Web Services.

For more details on Veeam Management Pack for System Center see the

[Veeam Management Pack for Microsoft System Center](#) web pages.

Standard Features

Veeam Backup for Microsoft 365

Protecting data created by SaaS applications is as important as protecting on-premises data. Even though Microsoft hosts the infrastructure, this doesn't remove the need to maintain a backup of the Microsoft 365 data. Veeam Backup for Microsoft 365 enables the protection of Microsoft 365 Exchange Online organizations, Microsoft OneDrive for Business and Microsoft SharePoint Online objects. The key features of Backup for Microsoft 365 are:

- Mailbox item recovery can be done directly to an Microsoft 365 mailbox, to an on-premises Exchange mailbox, saved as a file, sent as an email attachment or exported as a PST file.
- Protection of on-premises and hybrid Microsoft Exchange organizations.
- Comprehensive automation with full PowerShell and RESTful API support for all functionality.
- Back up Exchange Online mailbox data in the same format that Microsoft Exchange uses natively.
- Quick search and recovery of individual mailbox items residing in either archived Microsoft 365 content or on-premises Exchange backups.
- Local copy of your Exchange data reduces costs of retrieving emails for regulatory or compliance reasons.
- Can be used to migrate mailbox data between Exchange Online and on-premises Exchange organizations.
- Fast, efficient backup of Microsoft 365 OneDrive for Business accounts with the ability to restore and export files and folders with the Veeam Explorer for Microsoft OneDrive.
- Back up SharePoint Online and SharePoint on-premises.
- Flexible recovery options for SharePoint sites, documents, libraries and lists with Veeam Explorer for Microsoft SharePoint.
- Veeam Explorers built into Veeam Backup for Microsoft 365 to explore the contents of backup jobs.
- Self-service restore to minimize management overhead, improve recovery times and reduce costs.

For more details on Veeam Backup for Microsoft 365 see the [Veeam Backup for Microsoft 365](#) web pages.

Standard Features

Veeam Backup for Salesforce

Organizations rarely backup Salesforce until it is too late and the data is lost. Even though Salesforce manages the infrastructure, this doesn't replace YOUR responsibility to protect Salesforce from data loss and data corruption. Veeam Backup for Salesforce gives you complete access and control. You control the backups and you choose the storage. The key features of Veeam Backup for Salesforce are:

- Salesforce-native. Purpose-built to back up and restore Salesforce data and metadata.
- Custom Scheduling. Set granular backup schedules and retention settings at the object level.
- Simple and Easy-to-use UI. Click, click, click and done. Run backup policies and restore jobs in minutes.
- Fast and Flexible Recovery. Recover Salesforce records, hierarchies, fields, files and metadata.
- Simplified Management. Manage backup policies for several Salesforce organizations from one console.
- See and Compare. See versions of records and metadata and quickly compare it with production.
- Secure Your Data. Own your data. Run your backup environment anywhere: On-premises, in AWS, Azure and more.
- Incremental Changes. With incremental sync and flexible scheduling, you can back up your Salesforce data almost continuously.
- Restore Hierarchy. Granularly restore linked child objects to any record. You can restore parents' records as well.

For more details on Veeam Backup for Salesforce see the [Veeam Backup for Salesforce](#) web pages.

Veeam Kasten

Veeam Kasten is the leader in Kubernetes Backup and Disaster Recovery. Kasten helps enterprises overcome Day 2 data management challenges to confidently run applications on Kubernetes. Veeam Kasten for Kubernetes, a data management platform purpose-built for Kubernetes, provides enterprise operations teams an easy-to-use, scalable, and secure system for backup/restore, disaster recovery, and application mobility with unparalleled operational simplicity.

Complete application protection

Automatically capture and protect an entire application stack including resource definitions, configuration, and underlying data.

Coordinated application recovery

Always restore a consistent copy of your entire application. Properly orchestrate and order the restore of data, resource, and configuration components.

Policy-based backup automation and monitoring

Manage backups at scale through dynamic policies that apply to auto-discovered applications. Monitor data management compliance and easily take corrective action.

Standard Features

Application-specific protection

When volume-level protection is not sufficient, extend the workflow with a Kanister blueprint to apply application-specific operations.

The availability of perpetual and subscription options differ by product. Please check at the product level to determine whether the product is offered as a perpetual license, subscription license, or both. A range of support products are available to upgrade, extend and renew support entitlement.

For more information see the [Veeam Offerings web site](#)

Standard Features

Software and Support Licenses

Veeam Offerings and support licenses available from Hewlett Packard Enterprise

Product licenses are available at a reduced cost to public sector customers using public sector versions of the licenses.

Veeam Licensing Models –

Notes: See [Veeam Licensing Policy](#) for further details. See [Veeam Customer Support Policy](#) for further details.

Both Veeam socket-based and Veeam universal licenses are offered through HPE.

- Socket Licenses are sold individually per socket and are assigned to a physical socket.
- Universal licenses are sold in bundles of 10 instances, and enable the use of one license across many products and workloads, deployable on premise or in a (multi) cloud environment.
- **Migration products** are available to migrate existing socket licenses to universal licensing. Product migrations are restricted and require customized non-standard-quotes (NSQs) from Veeam. Reach out to your local Veeam rep or the WW HPE Veeam team for more information.
- Veeam Kasten for Kubernetes is licensed by node.

Veeam offers both perpetual and subscription license terms.

- Perpetual Licenses never expire and include 1 year of support. This can be upgraded and extended by purchasing additional support part numbers. This purchase must be made less than 6 months after the license is purchased. (1 month support is offered only to align support renewal dates.)
 - Support for perpetual licenses is available in basic (8x5) and production (24x7) levels.
 - Renewal years of support must be purchased over the life of the perpetual license when there is less than 6 months until the current support coverage is due to expire.
- Subscription Licenses are purchased up-front in the specified term length of between one and five years. 1 month subscriptions are offered only to align subscription renewal dates.
 - Veeam subscriptions include both the license and support for the product.
 - Renewal subscriptions must be purchased to extend the term length once the initial term nears expiration.
 - All Veeam subscriptions include production (24x7) level support.
 - Socket subscription conversion products are available to convert existing Veeam Data Platform Foundation and Veeam Data Platform Advanced socket perpetual licenses to socket subscription licenses.

Standard Features

Veeam Product Offering	Socket Perpetual	Socket Subscription	Universal Perpetual	Universal Subscription
Veeam Data Platform Foundation (previously Backup & Replication)	Available only to existing socket customers – Enterprise and Enterprise Plus Editions Available	Available – Enterprise Plus Edition Only	Available – Enterprise Plus Edition Only	Available – Enterprise Plus Edition Only

Veeam Backup for Salesforce	Veeam backup for Salesforce is licensed by Salesforce user, with a requirement for the customer to license 100% of their Salesforce user licenses. Licenses are sold as subscriptions.
Veeam Kasten	*Licensed per (worker) node.

Service and Support

Veeam Service and Support

All requests for support for these resold Veeam products should be made to Veeam because support is provided directly by Veeam.

Notes: See [Veeam Customer Support Policy](#) or visit the [Veeam customer support portal](#) to open a case, search the Veeam knowledge base, manage licenses, access numbers for phone support and for all other support and information.

Any support calls made to Hewlett Packard Enterprise for environments with HPE and Veeam products will be responded to in line with the support entitlement in place. If the issue is identified to be a Veeam issue the requestor will be directed to Veeam Support.

HPE Services - Service and Support

[HPE Services](#) offer everything from advisory and professional, operational, and managed, financial, asset management and lifecycle, supercomputing, storage and education services - expertly tailored to your business needs.

From planning to operating and beyond, our experts help you accelerate edge to cloud transformation, optimize operations, and maximize IT investments. Get the most from your HPE products with the expertise you need at every step of your IT journey with HPE Services. We help you lower your risks and overall costs using automation and methodologies that have been tested and refined by HPE experts through thousands of deployments globally.

HPE Service specializes in flawless and on-time implementation, on-budget execution, and creative configurations that get the most out of software and hardware alike.

Consume IT on your terms

[HPE GreenLake](#) brings the cloud experience directly to your apps and data wherever they are—the edge, colocations, or your data center. It delivers cloud services for on-premises IT infrastructure specifically tailored to your most demanding workloads. With a pay-per-use, scalable, point-and-click self-service experience that is managed for you, HPE GreenLake accelerates digital transformation in a distributed, edge-to-cloud world.

- Get faster time to market
- Save on TCO, align costs to business
- Scale quickly, meet unpredictable demand
- Simplify IT operations across your data centers and clouds

Managed services to run your IT operations

[HPE GreenLake Management Services](#) provides services that monitor, operate, and optimize your infrastructure and applications, delivered consistently and globally to give you unified control and let you focus on innovation.

Service and Support

Recommended Services

HPE Tech Care*

Notes: *Minimum required level of support is 3yr Tech Care Basic

HPE Tech Care is the new operational service experience for HPE products. HPE Tech Care goes beyond traditional support by providing access to product specific experts, an AI driven digital experience, and general technical guidance to not only reduce risk but constantly search for ways to do things better. HPE Tech Care has been reimagined from the ground up to support a customer-centric, AI driven, and digitally enabled customer experience to move your business forward. HPE Tech Care is available in three response levels. Basic, which provides 9x5 business hour availability and a 2 hour response time. Essential which provides a 15 minute response time 24x7 for most enterprise level customers, and Critical which includes a 6 hour repair commitment where available and outage management response for severity 1 incidents.

HPE Education Services

HPE Education Services is a Veeam Authorized Education Center (VMAEC) providing the officially licensed Veeam certification and HPE training for all audiences. HPE Education provides superior high quality delivery coupled with extended hands-on remote access to our virtual lab systems for extended learning enhancement on HPE systems. HPE also provides training for integrating Veeam with HPE Storage systems to provide customers with a complete HPE solution.

HPE Education Services training for Veeam (<https://education.hpe.com/ww/en/training/portfolio/storage.html#veeam>)

HPE Education Learning Credits offer flexibility and ease of purchase for training courses providing flexible consumption over the term of the training agreement (typically 12 months or as many as 5 years).

Learn more at [HPE Education Learning Credits](#) or contact your authorized HPE reseller for more information.

HPE Education Learning Credits for HPE Education Services may be included up-front with the software and hardware solution, included with a support agreement, or ad-hoc from HPE or HPE resellers.

- HPE Education Learning Credits for up-front purchase: SKU H33XSA1 ([solution brief](#))
 - Typical quantity of 40 or more credits per learner, where 10 credits are needed per training day (typical).

Service and Support

Course	Duration	Education Learning Credits
Veeam® Backup & Replication™ v12.3: Configure, Manage, and Recover	4-days	40
Integrating Veeam® with HPE Storage Solutions	2-days	20

- Training Credits for HPE support agreements: SKU HA167AC ([solution brief](#))
 - Contact your HPE support specialist for more information.

HPE Services - Advisory & Professional Services (A&PS)

Service overview

HPE Cybersecurity Services – Deployment for Veeam is designed to provide you with an integrated Veeam data protection solution. Having access to critical applications and data is crucial to keeping your business up and running at all times. Business today requires 24x7 access to data, efficient management, and little tolerance for downtime or data loss.

Hewlett Packard Enterprise implements Veeam Offerings by leveraging HPE, Veeam, and industry best practices to expedite the deployment and integration process while delivering an optimum solution. HPE offers consulting services that effectively deploy the solution you need by providing consultative services to install, configure, integrate, and upgrade Veeam within your environment based on your backup requirements. HPE has the expertise to help deliver secure ransomware protection with immutable and air-gapped backup and instant recovery. These are fixed-scope, fixed-priced services with multiple deployment options.

HPE is a Veeam Accredited Service Partner (VASP) that delivers high-quality professional services related to Veeam solutions. The VASP program accreditation is issued only to those with the highest Veeam solution expertise levels. All VASP members must meet mandatory requirements on technical expertise and Veeam certifications, as well as have a dedicated professional services staff and a history of successful Veeam implementations.

Service benefits

Helps to:

- Optimize Veeam Offerings within your IT environment based on your organization’s backup demands and business requirements
- Expedite your Veeam deployment efficiently by an HPE consultant
- Enhance your Veeam investment using HPE, Veeam, and industry best practices
- Manage data recoverability and the ability to meet data protection service-level agreements (SLAs)
- Achieving your recovery-point objectives (RPOs) and recovery-time objectives (RTOs)
- Deliver secure ransomware protection as part of cybersecurity
- Integrate with [HPE Storage](#) to create application-consistent backups from HPE Storage snapshots for fast, efficient data protection
- Address the 3-2-1 rule of best practice data protection prescribing that you retain three copies of your data, on two different media types, with one copy kept off-site

Service and Support

SKU	Service	Description	Duration

HPE ProLiant G11 Node for Veeam

HPE has tailored a HPE ProLiant Server configuration, the HPE DL380 Gen11, which combines with leading Veeam Data Platform products to create an integrated, all-in-one data protection platform for small and mid-size organizations as well as enterprise ROBO deployments. It offers a fast and cost-effective backup, replication, recovery, instant access and restore, in a convenient 2U platform.

Description

HPE ProLiant DL380 Gen11 Configure-to-order Server for Veeam Tracking

SKU

S3N87AAE

Ordering Instructions

- Locate the HPE ProLiant DL380 Gen11 Configure to Order Server for Veeam Tracking Menu (S3N87AAE) in OCA by starting a New Configuration, selecting “CTO” and typing “Veeam” in the Select Product field.
- In the HPE ProLiant DL380 Gen11 Configure to Order Server for Veeam Tracking Menu (S3N87AAE) you will find details on the requirements and options to customize the solution; example—Processors, Memory, Hard Drives, Network Adapter, Controllers.

Configuration Information

- When ordering the HPE ProLiant DL380 Gen11 Configure to Order Server for Veeam Tracking (S3N87AAE) you must confirm that the configuration is to support a Veeam customer workload. It is not allowed to use this product for non-Veeam solutions.

Veeam Offerings & Support SKUs and Ordering Instructions

Notes:

- Veeam has implemented several new ordering restrictions that we are addressing in OCA. One of them is the following: “Support terms must match on paired license and support items. Veeam will cancel orders if SKUs with 8x5 and 24x7 support terms are mixed.”
- Here is an example where the SKUs with mixed terms are NOT paired and the order was accepted.
 - R3S42AAE Veeam BUR Univ 1yr 24x7 Renew Sup
 - ROF15AAE Veeam BUR Ent 1yr 8x5 Renew Support
- To reduce the number of these occurrences and cancellations, we’ve implemented a filtering process in OCA to limit the SKUs presented to the user so only paired SKUs with the same support terms.

Step 1

- At the top of the Veeam Offerings Suite menu, see a new category titled “Software Support for Veeam”. If you want 8x5 support, you will have to open this category. Here you must select 8x5 Support and then you will see only the paired SKUs with 8x5 support available for selection.
- If the 8X5 support option, is not selected the default is 24x7 support and OCA will only show paired SKUs with 24x7 support.

Software Support Veeam		
Product	Description	Quantity
24x7 Support	Veeam Offerings 24x7 Support	0
8x5 Support	Veeam Offerings 8xS Support	1

Step 2

Select the remaining Base and Optional Licenses to complete the Veeam solution.

Configuration Information

Uplifts to be used to upgrade from Production (24/7) to Premier level support. 1 month support part numbers are only to be used to align support renewal dates for support contract cotermin.	

Configuration Information

Veeam Data Platform Advanced

Veeam Data Platform Advanced bundles Veeam Data Platform Foundation product with Veeam ONE. It also includes management for physical machines and Microsoft 365 protection. This enables single console management for virtual, physical and cloud-based workloads. The one month licenses are for aligning support renewal dates for new licenses and existing licenses.

Notes:

- This product is available with a subscription and a perpetual license scheme. It is not supported to mix subscription and perpetual license schemes in the same environment.
- The perpetual licenses include 1 year of either Veeam 8x5 or 24x7 support. This can be upgraded or extended up to 5 years, by purchasing additional support part numbers. This purchase must be made less than 6 months after the license is purchased.
- Support renewal part numbers can only be purchased when there is less than 6 months until the current support coverage is due to expire.
- The monthly part numbers are only to be used to align renewal dates.
- See [Veeam Licensing Policy](#) for further details.

Veeam Data Platform Advanced Universal Subscription Licensing

Notes: Subscription Universal licenses cannot be merged with Perpetual Universal license. For centralized management, all VULs must be subscription. See [Veeam Licensing Policy](#) for further details.

Configuration Information

Notes:

- Maintenance Renewal SKUs. Support level (8x5 or 24x7) must match license support level. 24x7 SKUs to be used for Production (24/7) support in year one or to upgrade from already-paid regular to Production (24/7) support. Expired socket contracts qualify, but must be renewed if within the first year of expiration. Monthly SKU to be used for support contract cotermin only.
 - Premier Uplift Support products are restricted by Veeam. Veeam must issue a non-standard quote (NSQ) prior to quoting or sale. Reach out to your local Veeam account rep if needed.
-

Configuration Information

Veeam Recovery Orchestrator (previously Veeam Disaster Recovery Orchestrator)

Notes: Veeam Recovery Orchestrator is also sold bundled with Veeam Data Platform Advanced as Veeam Data Platform Premium. Multiyear Subscriptions with Upfront Billing contain all years in one SKU. Customer commits to pay for the entire length of the contract upfront. See [Veeam Licensing Policy](#) for further details.

Veeam Management Pack for Microsoft System Center

Hewlett Packard Enterprise resells Veeam Management Package Enterprise Plus Edition. This is available with a perpetual license which includes one year of 8x5 or 24x7, extendable and upgradable, support. For existing users, Hewlett Packard Enterprise also resells the upgrade to Veeam Management Package Enterprise Plus Edition from the Enterprise Edition. The one month license is for aligning the support renewal dates for newly purchased licenses with existing licenses. See [Veeam Licensing Policy](#) for further details.

Configuration Information

Veeam Capacity Pack (formerly NAS Capacity)

License for larger NAS and Object Storage unstructured data backups, generally greater than 250TB. Offered alongside the respective Veeam Data Platform Premium, Advanced or Foundation environments, in increments of 1TB for Veeam Data Platform Premium edition. Support and Maintenance aligns to the Veeam Data Platform contract.

Veeam Capacity Pack Subscriptions and Subscription Renewals are sold by 1TB at three pricing tiers: 250TB-499TB products, 500-999TB products and products for installations of 1PB and above. Veeam non-standard quotes are no longer required for Subscription Capacity Pack products, but Veeam NSQs will be needed to order any of the perpetual Capacity Pack products.

Notes:

- When Capacity pack license is present, all Unstructured data (NAS, Object Storage, etc) will be protected by the Capacity licenses and VUL licenses will no longer be used for protecting any Unstructured data.
- Veeam Perpetual Capacity Pack products (SKUs R8E63AAE- R8E88AAE) require Veeam Non-standard quotes (NSQs) to be quoted and ordered.
- See [Veeam Licensing Policy](#) for further details.
