INSTALLATION

- 1) Determine rotation direction (Default rotation is to the left). To switch rotation, turn over and move Set Screw to opposite side. **(FIGURE A)**

- 2) Place in desired location with Thumbscrews in secured position (This ensures a square installation). Check clearance and setback for door closure, room for cables, etc.
- 3) If required, mark exposed mounting holes in the back of the rails and remove REB. Drill pilot holes with 3/32" drill bit. **(FIGURE B)**

- 4) Place REB back in desired location. Affix to surface using provided #10x5/8 Wood Screws. **(FIGURE C)**

FIGURE C
