

LATCH, MINIMUM CLEARANCE, DWR/SR SERIES

DWRSR-ZL |

FEATURES & BENEFITS

Front mounted latch saves valuable wall space by allowing wall racks to be placed side-by-side, in a corner, or wherever side clearance is an issue. To open, simply pull the convenient front-mounted handle. Unlike time-consuming threaded rods, this unique latch provides keylocked security from the front (keyed differently from optional front door). Easy to install; required for seismic installations.

- Patented system allows close mounting of two DWR units
- Also allows close mounting to a wall or other obstruction
- Keeps center section closed without locking
- Easy one-person installation
- Keyed differently than optional DWR front doors for security
