

# INSTRUCTION SHEET

## VBK SERIES

### VENT BLOCKERS

#### THANK YOU

Thank you for purchasing a VBK series vent blocker. Vent blockers are used to ensure proper active thermal management when used in conjunction with exhaust fans. They are designed to prevent the short circuiting (recirculation) of air flow. If a fan is placed near an intake vent, it will pull in some of the outside air to help dissipate the heated air inside of the enclosure.

**NOTE:** Only one side of the vent blocker is magnetized for increased adhesion.
