

ProDockExtreme®

Universal USB-C to 4K HDMI, 4K DisplayPort® Dual Screen

Simple, Effective USB-C Connectivity

The ProDockExtreme® Universal USB-C to HDMI & DisplayPort® Docking Station provides a simple and effective connectivity solution for charging, data transfer and video display from USB-C devices. Users can choose between single 4K HDMI®, single 4K DisplayPort® or dual screen, mirror and extend for video output, with 100W power delivery from USB-C port.

Display, Charge, and Transfer with Ease

HDMI port supports video resolution up to 4K/2K@30z, both video and audio support HDCP1.4 and 3D video format at 1920/1080p@60Hz. DisplayPort® support video up to 4K/2K@30Hz, supporting both displays simultaneously.

Transfer data with ease and speed, with a 10Gbs USB-C data port and 5Gbs USB 3.0, both USB 3.0 ports can be used at the same time, both ports also support 5V 1.5A fast charge for external devices.

Portable and lightweight, the ProDockExtreme® is ideal for charging, data transfer, and video displays in virtually any working environment.
