

ANTI-SCRATCH EFFICIENT AND ECONOMICAL PROTECTION

KEY POINTS

- Strength : the strenght of these products is their **economical side**. It's the most accessible Mobilis screen protector.
- User experience : Its **PUT composition** doesn't equal a glass touch but keeps a **sliding touch** allows you to fully enjoy all the fonctionnalities of you device.
- In front of an impact : Anti-Scratch offer a **simple and effective protection** while being the most economic Mobilis screen protector. **Easily installables**, they protect your screen against all daily small attacks.

2 finishes available : Clear and Matte

How to choose your finish ?

You need optimal visibility : Clear is a transparent finish without any filter between the screen and the eye.

You use your device outdoors, or don't want to see fingerprints anymore : The Matte finish removes bothersome light reflections. Its satin finish make fingerprints invisible and keeps your screen clean longer.

More than 2 000 references available for smartphones, tablets, hybrid Pcs, notebooks...

4H Hardness Anti-Scratch

Our shock-resistant screen protectors are rated 4H on the hardness scale between 0H and 10H (for diamonds), which determines resistance to touch, pressure, shearing, friction and shock.

IK02 norm protection

The IK standard determines the level of protection against mechanical impacts, according to the NF EN 62262 norm (NF C 20-015). A rating of IK-02 indicates a 0.2 Joule impact resistance.

Why a screen protector ?

91% of users have already broken a screen !

On average a screen costs :

- 500 € for a laptop
- 200 € for a tablet
- 100 € for a smartphone

Protecting the device 100% of the time increases its lifespan and thus improves the Total Cost of Ownership !
