

Fire Safes

The Yale Fire Safes have been built and tested to withstand intense heat up to 972°C, humidity and any form of attacks giving you peace of mind that your important things are in safes hands.

These safes are built with the latest technology in fire insulation, which provides a high security rating and allows more room for your valuables inside your safe due to the thinner wall thickness. For added security, the safes' locking bolts are on both hinge and frame side.

The safe will automatically lock down after 5 incorrect codes have been entered or you can even set the touchscreen lockdown mode for up to 48 hours, for added security while you're away.

Suitable for:

Jewellery

Watches

Important Documents

Passports

Smart Devices

Keys

Laptop

Camera

- PIN code and option for one time user code for visiting guests, access through touchscreen keypad
- Lockdown can be set between 3 and 9 minutes after five incorrect PIN attempts
- Lockdown mode: lockdown the touchscreen for between one and 48 hours for added security while away
- Tested to withstand minimum one hour of intense heat (up to 972°C)
- Locking bolts on each side of door for added security (16mm bolts that slide into the frame and 18mm fixed bolts on hinge side)
- Low battery indicator
- External 9V battery option to gain emergency access when internal batteries are flat (battery not included)

Trusted every day

Specifications

Access credentials	PIN code access
