*Mobile broadband speeds will vary and are dependent on a range of factors including network configuration, network capacity, signal strength, and the conditions of your mobile broadband subscription. **Maximum wireless signal rate derived from IEEE Standard 802.11 specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction as well as network overhead, can lower actual data throughput rate. Environmental factors will adversely affect wireless signal range. †Supports microSD cards up to 32 GB capacity. ‡Battery life may vary due to network and environmental conditions including signal strength, data volume, and network traffic. ©2019 D-Link Corporation/D-Link Systems, Inc.
