Highlights

8 delicious coffees

The brew group is the heart of every bean-to-cup coffee machine and should be cleaned regularly. The removable brew group allows you to clean it thoroughly just by rinsing it under the tap.

LatteGo milk system

Enjoy silky-smooth cappuccino, even with your favourite plant-based milk alternatives. Thanks to the cyclonic frothing technology, LatteGo transforms various types of milk and plant-based alternatives with the right amount of fat and protein into the best possible dense layer of foam.

Intuitive display

There's little standing between you and your next delicious cup of coffee with the Philips 4300 Coffee Machine's easy-to-use display. In a few steps you can customise your fresh-bean flavour and flow smoothly from craving to cup.

Coffee customiser

The Philips 4300 Series Bean-to-Cup Coffee Machine lets you make any coffee your own with the coffee customiser's easily adjustable settings for intensity, coffee and milk length.

User profiles

Enjoy coffee you love the same way every time with two user profiles that store your customised recipes. With an extra guest profile, your visitors can savour a coffee exactly the way they like, without changing yours.

Perfect temperature and aroma

The Aroma Extract system intelligently strikes the optimum balance between brewing temperature and aroma extraction by keeping the water temperature between 90 and 98°C, while regulating the water flow rate, so you can enjoy delicious coffees.

12-step grinder adjustment

Our durable ceramic grinders can be adjusted in 12 steps, so you can turn your beans into anything from ultra-fine powder to coarse grindings.

100% ceramic grinders

Bring out the full flavour of your coffee with our hard-wearing ceramic grinder. Our sharp-edged grinders extract the best aroma and flavour from your beans. Made from 100% ceramic material which ensures that they last for at least 20,000 cups, from coarse to ultra-fine.

Exceptionally easy to clean

For your convenience, you can put the LatteGo drip tray and the coffee ground container in the dishwasher. The Philips LatteGo 4300 will save time and ensure a hygienic clean.
