

PENSANDO DISTRIBUTED SERVICES PLATFORM DSC-25 ENTERPRISE 10/25GB 2-PORT SFP28 CARD (P26966-B21)

Smart IO

OVERVIEW

Do you need edge acceleration in your data center? The Pensando Distributed Services Platform for Hewlett Packard Enterprise servers provides a powerful suite of software-defined services, like firewall, encryption, and tunnelling, directly to the server, dramatically boosting network and security performance by moving those services to

the server edge, where the transition between network and server occurs

This revolutionary approach eliminates the need for an assortment of discrete appliances throughout the data center by integrating networking and security functions into a single device residing in a single server, tightly coupling policies to just that server and its users. No longer are server and user demands queuing behind unrelated demands on shared appliances. Coincidentally, because the functions are resourced at the server edge, performance and capacity scaling are incremental, observability is pervasive and granular, and latency is significantly reduced.

FEATURES

Always-on Telemetry and Deep Observability

Pensando Distributed Services Platform brings sophisticated wire-speed telemetry to HPE servers, providing real time observability and insights for network and storage, without affecting application performance.

Always-on telemetry at the server edge enables proactive end-to-end troubleshooting and problem reporting, minimizing down-time and significantly reducing mean time to repair (MTTR).

Micro Segmentation for KVM and Containerized Application Tiers

The Pensando Distributed Services Platform isolates KVM/Hyper-V and containerized application tiers from each other on Hewlett Packard Enterprise servers and achieves “zero-trust security” enforced within each machine by the Pensando Distributed Services Card (DSC).

Microsegmentation can be applied – per VM, container, or workload – on the DSP subsystem with full isolation from host-based vulnerabilities.

Distributed Stateful Firewall for Bare-Metal, KVM, and Containerized Environments

Pensando DSP enables policy enforcement and whitelisted communications between servers within the data center (East-West security).

Pensando DSC implements an enterprise-class, centrally managed stateful firewall at each server edge.

Advanced firewall functionality includes Application Layer Gateway (ALG), and packet-based DDoS attack protection (Flood, TCP SYN, fragmentation, Ping-of-Death (PoD), and more).

Simplified Infrastructure Operations

Pensando DSP eliminates multiple discrete network and security appliances such as an East-West stateful firewall.

Eliminates complexity and latency associated with network tromboning-effect through multiple appliances.

A simplified architecture and always-on visibility results in fewer outages and faster mean time to repair (MTTR).

Replaces multiple appliances, reducing costs and complexity, all while improving security.

Pensando DSP lowers total cost of network and security services per server.

Technical specifications

Pensando Distributed Services Platform DSC-25 Enterprise 10/25Gb 2-port SFP28 Card

Product Number (SKU)	P26966-B21
Port speed	25 Gb
Number of ports	2
Bus type	PCIe Gen3 x8
Connector type	2xSFP28 and RJ45
Form factor	Standup Pcie, Half-height half-length
Supported Cables	HPE 25GbE SFP28 to SFP28 3m Direct Attach Copper Cable, HPE 25GbE SFP28 to SFP28 5m Direct Attach Copper Cable, HPE 25GbE SFP28 to SFP28 7m Active Optical Cable, HPE 25GbE SFP28 to SFP28 15m Active Optical Cable, HPE 25Gb SFP28 SR 100m Transceiver
Compatible operating systems	Red Hat® Enterprise Server SUSE® Enterprise Linux Server VMware® vSphere ESXi Microsoft® Windows® Server
Power	25 W maximum 21 W typical use
License Type	E-RTU
Support Coverage	24x7 and 5, 4, 3, and 1 year Licenses
Subscription Term	1, 3, 4, and 5 year terms
Weight	0.44 kg
Minimum dimensions (H x W x D)	21.49 x 24.69 x 6.2 cm

HPE POINTNEXT

Access expertise at every step of your IT journey with [HPE Pointnext Services](#). [Advisory Services](#) focuses on your business outcomes and goals, to design your transformation and build a roadmap tuned to your unique challenges. Our [Professional](#) and [Operational Services](#) help speed up time-to-production and keep your IT stable and reliable.

Operational Services from HPE Pointnext Services

- [HPE Datacenter Care](#) helps modernize and simplify IT operations. Partner with an assigned account team, access technical expertise, an enhanced call experience gives you priority access, choose hardware and software support, implement proactive monitoring to help stay ahead of issues, and access HPE IT best practices and IP.
- [HPE Proactive Care](#) offers an enhanced call experience and helps reduce problems with personalized proactive reports and advice. This also includes collaborative software support for Independent Software Vendors (ISVs), (Red Hat, VMWare, Microsoft, etc.). [Read more](#)
- [HPE Foundation Care](#) helps when there is a problem and has a choice of response levels. Collaborative software support is included and provides troubleshooting help for ISVs running on your server. [Read more.](#)

Other related services

[Defective Media Retention](#) is optional and applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

[HPE Service Credits](#) offers a menu of technical services, access additional resources, and specialist skills.

[HPE Education Services](#) delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

HPE GREENLAKE

[HPE Greenlake](#) is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.

If you are looking for more services, like **IT financing solutions**, please [explore them here](#).
