Long Description

DIGITUS[®] slim patch cords are characterised by their small outer diameter and flexible sheath. Slim design enables versatile use in your network. Moreover, DIGITUS[®] slim patch cords are manufactured according to ISO/IEC 11801 and DIN EN 50173 CAT 6_A standards. They guarantee that the cable installation complies with the ISO & EN channel specification and provide excellent performance in DIGITUS[®] CAT 6_A cabling. Performance was tested up to 500 MHz, including performance characteristics such as near-end crosstalk ("NEXT"). DIGITUS[®] patch cords were specifically designed to fully meet all requirements in various application areas. Each cable is equipped with a moulded anti-kink sleeve with strain relief. In addition, the sleeve has a locking lever protection, which prevents kinking of the cables and breaking-off of the locking lever from the connector. Category 6_A is simply identified by the red coloured connectors.
