StageScreen® with Dress Kit Skirt and Hardware,  
LEFT is back view, RIGHT is front view.

StageScreen® and StageScreen® with  
Dress Kit Skirt and Hardware

■ Create a polished, theater-like presentation with a StageScreen Dress Kit. Velour drapes frame the viewing surface, drawing the audience's focus toward your presentation on the screen. In addition to framing your presentation, dress kits hide projection equipment, shield the audience from projector light, and help eliminate ambient light in the projection area in rear projection applications.

## FEATURES

- A COMPLETE STAGESCREEN DRESS KIT includes a 68" (173 cm) tall skirt, 14" (36 cm) tall valance, universal valance bars, a pair of 32" (81 cm) wide side drapes and adjustable drapery bars.
- Valance and drapery bars attach to frame without tools.
- A wheeled heavy-duty polyethylene carrying case is included.
- FABRIC: Inherently Flame Retardant (IFR) Velour is standard for StageScreen Dress Kits. Draper's IFR Velour never needs retreating—it is flame retardant for the life of the fabric. Black color is standard.

Flame Retardancy Standards  
Draper's Inherently Flame Retardant Velour is manufactured and certified to meet these flame retardancy standards: NFPA 701, MVS-302, BIFMA-F-1-1978, SC-191-53 Class 1 California, and UFAC Class 1.

- ATTACHMENT: The StageScreen Dress Kit hardware is modular and universal for any size screen. Extendable two-piece drapery bars attach to each side of the frame to support the drapes. Valance bars are evenly spaced across the top of the screen. The side drapes and valance attach to the hardware with DuraLoops™. The skirt also utilizes DuraLoops™ on each end and built-in magnetic connectors for fast and easy attachment.
- DuraLoop™ are bungee cord loops that attach quickly and lasts longer than traditional snaps.

## SUPPORTING DOCUMENTS
