

Getting the best usage from your Kleenex® Ultra Rolled Hand Towels

For a continuous roll:

1 Move the nearly empty roll to the back of the dispenser once the indicator shows. Ensure the towel is tucked under the blue arms.

2 Add new roll to the roll holders and feed towel under blue bar.

3 Close dispenser and push the lever underneath until roll reappears ready to dispense. Each towel is dispensed by pulling downwards with both hands.

Then fold back new rolled towel.

Please note: the lever is only used during the loading process, not to dispense the towel.
