

## Quick Installation Guide

EN

### Precautions:

Please ground yourself before handling your Lexar memory, as Static electricity can cause damage to the module and other components in your system.

- To protect your new memory, avoid touching the connectors. Handle your Lexar memory using its edge or frame.
- Do not disassemble, crush, short circuit, or do any kind of modification to your memory, as it may cause unexpected hazards.
- Keep your memory away from any kind of moisture. Moisture can cause electric shocks with any electronic device.

Do not touch gold pins

Do not stack

Do not bend

Do not drop

### Installation Guidelines:

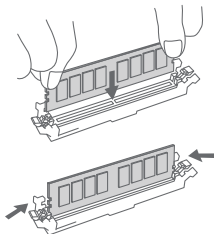

Before installing your Lexar memory, please take all necessary precautions to comply with your computer manufacturer's handling instructions.

1. Power off your computer and disconnect the main power cord from the wall outlet. If your computer uses battery power, remove the battery.
2. Refer to your computer manufacturer's instructions for details on how to remove the outer case, and where the memory connectors are located.

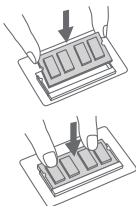

### General Memory Module Installation Steps:

Follow below steps to complete the memory product installation:

#### • Desktop DIMM Installation

#### • Laptop SO-DIMM Installation
