Net weight article (gr.)	558

This Gecko Keyboard Cover is designed to take your iPad Pro experience to the next level. It integrates a high quality keyboard with backlighting, as well as a touchpad. The cover is both sleek and portable, and offers excellent protection. The high quality Bluetooth Keyboard brings a laptop-like typing experience to your tablet, and is even splash proof!

High quality keyboard - The integrated keyboard is a joy to type on, and it's even designed to be splash proof – just in case. On a full charge it can be used for over 100hrs, and even has an impressive 100 day standby time.

Create a laptop-like experience - The addition of a touchpad and keyboard backlighting to this cover, creates an almost laptop-like experience for your tablet. This is especially useful for productivity, and makes working or studying much easier.

Designed for use with an Apple Pencil - The iPad Pro is often used together with an Apple Pencil, and we designed this keyboard cover with that in mind. The specially shaped holder allows you to store and charge your Apple Pencil, and makes sure it's firmly in place so you won't accidentally lose it.

Choose your viewing angle - The integrated fold-down stand offers a steady support for your laptop, and allows you to choose the perfect viewing angle. This greatly improves ergonomics by decreasing the strain on your neck.
