

## Universal 3-in-1 Keyed Cable Lock with Twin Lockheads - Master Keyed

Lock two devices with a single solution.

K63381EUM

### Product Description

Now you can lock two devices with a single solution. The Universal 3-in-1 Keyed Cable Lock with Twin Lockheads fits standard, nano and wedge-shaped security slots, ensuring a universal fit regardless of hardware brand or generation. Perfect for securing multiple devices such as a laptop, monitor or docking station, making cable and key management easier, decreasing cable clutter and helping to futureproof your locking solution. Lock tips are easily changed: a tether keeps unused lock tips handy. A common 5mm keying system, patented Hidden Pin™ technology and carbon steel cable provide strong security against picking and theft attempts. A pivot and rotate lock head allows flexible movement and easy key insertion. Additional features include Register & Retrieve™ for quick, secure and easy key replacement and a five-year warranty backed by Kensington, inventor and worldwide leader in laptop security locks. All Kensington locks are verified and tested for strength, physical endurance, and mechanical resilience.

### Features

- Twin lockheads allow you to lock two devices with a single solution. Perfect for securing multiple devices such as a laptop, monitor or docking station. Makes cable and key management easier and decreases cable clutter.
- One lock for any slot - fits standard, nano or wedge-shaped security slots, regardless of brand or generation, helping to futureproof your locking solution. Lock tips are easily changed: a tether keeps unused lock tips handy.
- 5mm keying system is common across all of Kensington's latest locks, so there's only one keying system to manage. The smaller key opening helps thwart picking attempts. Master keyed provides administrative access so IT managers can have a key for all locks, while each user has their own individual lock and key.
- Patented anti-pick Hidden Pin™ technology resists tampering and offers peace-of-mind. 1.8m (6') cable with plastic sheath delivers cut and theft resistance.
- A special pivot and rotate hinge on the lock head allows flexible movement and easy key insertion.
- Register & Retrieve™, Kensington's online key registration program, allows for quick, secure and free key replacement if ever lost or stolen.
- Kensington locks are verified and tested. Each lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance and mechanical resilience.
- A five-year warranty means you can rest assured knowing you're covered by Kensington, inventor and worldwide leader in laptop security locks.
