HPE and Commvault

HPE StoreOnce integration with
Commvault

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and Commvault are collaborating in a fresh new way to bring increased value to customers like you.

In a modern hyper-connected world, organizations are faced with several challenges due to the complex data landscape, retention of data spread across silos creating data sprawl, the cyber resiliency of the environment and overprovisioning for future growth. HPE and Commvault have partnered to solve these complex data challenges through a unique data protection approach designed to secure, defend, and recover data that is distributed across the environments, from edge to cloud.

To help satisfy these needs, Commvault is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Commvault has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

Commvault Complete Data Protection and Recovery: Digital transformation and cloud adoption continue to drive data growth at an accelerated rate. As data grows, and spreads from edge to cloud, there is an increased risk in the security of that data. Businesses need solutions that offer protection and secure against the threats of tomorrow. Commvault leads the next generation of data protection offering active defense across production and backup data. This results in unprecedented early warning of attacks, active defense to reduce the impact of intrusion, unrivaled data compliance, and rapid recoverability to reliably deliver business continuity.

HPE StoreOnce systems: Backup appliances that offer simple affordable and flexible data protection with rapid recovery and application integration. Reduce cost, risk, and complexity with a cloud-ready data protection platform. HPE StoreOnce provides rapid data recovery and low-cost archive and disaster recovery in the cloud that can scale from small remote offices to the largest enterprises and service providers.

Enhanced security

HPE and Commvault have worked together to provide configurable data immutability. Commvault Compliance lock and WORM storage controls keep retention locked in and apply object lock controls on cloud, and on HPE StoreOnce systems. HPE StoreOnce Catalyst ensure that you can configure backup data immutability backups so that they that can't be encrypted, modified, or deleted during the configured retention period. Secure by design, backup copies are encrypted and inaccessible to ransomware and malware threats making sure that backups are not compromised.

Company overviews

About Commvault

Commvault is a global leader in data protection from edge to cloud. With a unique data protection platform designed to secure, defend and recover hybrid cloud and on-premises data, businesses can go beyond traditional backup and recovery to protect against evolving threats of tomorrow—reducing their risk and ultimately controlling their costs.

About HPE

HPE is the edge-to-cloud company that helps organizations accelerate outcomes by unlocking value from all of their data, everywhere. Built on decades of reimagining the future and innovating to advance the way people live and work, HPE delivers unique, open, and intelligent technology solutions, with a consistent experience across all clouds and edges, to help customers develop new business models, engage in new ways, and increase operational performance.
