FM3080 Hind
Stationary Scanners

Features

Snappy on-screen barcode capture.
The FM3080 Hind is armed with Newland's sixth-generation of UIMG® technology. This CPU-based scanner excels at reading on-screen barcodes that contain a large amount of data.

Instant visual feedback.
With up to 4 color options available, the white scanning window of the FM3080 Hind can light up each scan. It can be programmed for different barcodes, a successful read, or to match your company brand.

Small form factor.
Dimensions of 78.7 x 67.7 x 47.5mm make the FM3080 Hind the smallest of the FM30 series. As a result, it takes up minimal space in a kiosk or at the POS.
IR and light sensors.
In order to achieve higher productivity, the FM3080 Hind has a combination of an IR sensor and light sensor. This combination creates improved sensitivity in activating the scanner to scan the presented barcode.

IP65 sealing.
The FM3080 Hind possesses a high IP-rating of IP65, making it resistant to water and dust.

Anti Reflection
The updated FM3080 Hind has a coating on the underside of the glass to reduce the reflection and glare, making reading barcodes from screens, even snappier and user friendly.
