AV Controller Administrator Key

USB adapter for use with an AV Control System

OVERVIEW

This AV Controller Administrator Key allows access to certain functions within an AV controller. This small, easy-to-store tool unlocks powerful tasks that save time and money. Users can upload/download new equipment configuration scripts within the administrative mode, allowing easy deployment across multiple controllers as room equipment changes. It also provides infrared (IR) programming capabilities, making it hassle-free programming via remote control. Firmware updates can also be made across multiple controllers without the need to remove them from the wall.

FEATURES

— Supports functions within an AV Controller

— Supports administration mode for easy deployment

— Access for infrared (IR) programming capabilities
