COVID has made rock stars out of the world’s leading pharma businesses. It has also revealed the connected, global nature of the industry, and the critical nature of rapid innovation and lock-tight regulation. For Unichem Laboratories Ltd., a world-leader in the production of generic drugs, its vision goes beyond COVID; it wants to lower the cost and widen the availability of live-saving treatments.

OBJECTIVES

- Shorten the gap between discovery, regulatory approval, and production
- Expand access to life-saving drugs in emerging economies
- Create a common data set to accelerate innovation

REQUIREMENTS

- Establish a reliable, scalable infrastructure for global workforce
- Develop a hyperconverged infrastructure to drive efficiency
- Strengthen business continuity through faster data duplication
