Features

- Slim profile made especially for ultra-thin and 2-in-1 laptops. Tested and approved by Dell.
- Does not block valuable ports, allowing for full use of laptop's ports while attached.
- Won't raise the laptop off its surface and cause it to wobble, allowing the laptop to lie flat and stable.
- Kensington locks are verified and tested. Each lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance and mechanical resilience.
- 1.8m (6') carbon steel cable delivers the same level of cut-resistance and theft-resistance as thicker cables. Special hinges create great freedom of movement, eliminating awkward angles and allowing you to insert your key with complete ease.
- The 5mm keying system is common across all of Kensington's latest locks, so there's only one keying system to manage.
- Register & Retrieve™, Kensington's online key registration programme, allows for quick, secure and free key replacement if ever lost or stolen.
- Like keyed provides administrative access designed for wider flexibility and freedom to all equipment. This solution provides employees with identical keys that can open all locks, offering a solid layer of security against non-employee theft without restricting employee access and productivity.
- A five-year warranty means you can rest assured knowing you're covered by Kensington.
