## Expanding patient services, reducing wait times

“Technology isn’t what gives me satisfaction as an integrator.  
Bringing services to our patients does.”

– **Kelly Newboles**, Senior Network Administrator, PrairieStar Health Center

**With over 65,000 patient visits a year across comprehensive health services, PrairieStar Health Center seizes every moment to care for everyone who walks through its doors, regardless of their ability to pay. Driven to deliver and expand quality patient services, PrairieStar Health Center relies on an IT environment that can keep pace in alignment with its vision for the community.**

### Objectives

- Rapidly expand patient services to the community
- Deliver quality patient care with reduced wait times
- Provide care for everyone, regardless of the ability to pay

### Requirements

- Flexibility and portability; not tied to any specific hardware
- Vendor alignment with PrairieStar Health Center's vision
- Stability and predictability in IT environment

### Solution

- HPE GreenLake edge-to-cloud platform
- HPE Alletra 6030
- HPE ProLiant DL380 Servers
- Data Services Cloud Console
- HPE InfoSight

### Key partners

- ISG Technology, LLC

### Outcomes

- Enriches caregiver-to-patient face time for more thorough care
- Decreases record search times and speeds up patient registration
- Reduces time spent on reporting by 83% (six hours to one hour)
