Saturn PX360-V2

The new and improved Saturn PX360 can deliver a maximum of 12MP which equates to a massive (4000x3000) @20fps. At 4K (3840x2160) the frame rate can increase to 30fps. The maximum frame rate you can achieve is 60fps at 1080 resolution.

4K allows you to capture 4 times larger the amount of viewable image.

Having 4K combined with the PX360 gives you an unprecedented quality in the camera thus giving you superior appearance when viewing in ePTZ mode.

With 4 streams at your disposal and only 117mm in diameter, this PX360 camera punches well above its weight for its size.
